Leather Strap

Measuring Guidelines

STRAP LENGTH

Please measure from tip to tip of swivel hardware.

STITCHING REQUIREMENTS

Length: 4" less than strap length
Approximately 2" of needlepoint on each side will be covered by ribbon

Width: standard finished width is 1¼ inches wide
Please add an 2 additional rows TOP and BOTTOM for a folded edge finish.

Folded edge: The folded edge requires stitching 2 additional rows top & bottom. Customarily, the additional rows are stitched using the dominant background color. If no additional rows are stitched, a good portion of the design will be lost, and your final width will be reduced.

Binding Stitch: Another way to finish your needlepoint belt is to use the binding stitch along the top and bottom edge. The addition of the binding stitch replaces the need for fold rows.

Should you have questions, please send me an email: MarymacNJ@gmail.com
We are happy to answer any questions.
